SUBJECT INDEX

Anti-Rh Serums, Human, The Action of Sodium Ethylmercurithiosalicylate, on, 116
Arsenic in Body Fluids, Simple Procedure for Detection of, 36
Arsenic, See also Mercury, Bismuth, and Arsenic, 83
Basket Carrier for Dehydration of Tissue, 125
Benedict test, see also glycosuria, 117
Bile, Note on the Clarification of, 53
Bilirubin, A Method for the Quantitative Determination in Serum with the Photoelectric Colorimeter, 55
Bismuth in Urine, A Rapid and Specific Method for the Estimation of, 81
Bismuth, See also Mercury, Bismuth and Arsenic, 83
Blood and Plasma, Filter Drip Unit for Dispensing, 75
Blood Bank Service Utilizing Assembled Parts, The Operation of, 28
Blood Collection Tray, 62
Blood or Blood Derivatives, A Practical Inexpensive Apparatus for Administering of, 122
Cerebrospinal Fluid, Determination of Proteins by the Biuret Method, 43
Cerebrospinal Fluid Protein, Note on the Measurement by the Biuret Method, 47
Cleaning of Loeffler Tubes, 137
Colloidal Gold, Standardized, Simple, Preparation of, 8
Complement-Fixation Reaction, Sheep Erythrocytes for, 103
Dehydration of Tissue, Basket Carrier for, 125
Differentiation of Leucocytes in the Counting Chamber by Propylene Glycol-Aqueous Stains: A Screen for the Detection of Major Blood Abnormality, 48
Embedding Boats, Plaster of Paris, 126
Erythrocyte Fragility, 21
Eye, Pathologic, Microtechnic of, 131
Filter Drip Unit for Dispensing Blood and Plasma, 75
Flocculation, Precipitin and Agglutination Reactions, Simple Instrument for Reading of, 39
Fragility, Erythrocyte, 21
Friedman Pregnancy Test, Note on Using Blood Serum, 97
Friedman Test for Pregnancy, Toxicity of Urine, in, 41
Fungus Studies, Tube Holder for, 101
Glycogen, Convenient and Rapid Method for Staining, in Paraffin Sections with Best's Carmine Stain, 9
Glycosuria, A Simplified Benedict Test for, 117
Helminth Ova, Method for, 135
Kahn Like Antigen from a Tissue other than Beef Heart, Preparation of, 107
Latex Rubber-Injected Specimens, Microscopy of, 128
Laughlen Test, 109
Leucocytes, Differentiation of, See also, Differentiation of Leucocytes, 48
Lead Semisolid Agar, a Medium for Use in the Identification of the Enteric Group of Bacteria, 1
Loeffler Tubes, see also Cleaning of, 137
Malaria and Other Cell Containing Body Fluids, Staining Method for Thin and Thick Smears, 68
Medium, New, for Differentiation of Salmonella and Paracolon Organisms, 26
Meningococci Typing, directly from Spinal Fluid, 35
Mercury, Bismuth and Arsenic in Body Fluids, A Rapid and Specific Method for the Detection and Estimation of, 83
Microscopy of Latex Rubber-Injected Specimens, 128
Microtechnic, see also Eye, Pathologic, 131
News and Notices, 41, 85, 101
Ova, See also Helminth Ova, 135
Paraffin Embedding Apparatus, 58
Penicillin for Local Application, Preparation of, 65
Photoelectric Colorimeter, Method for Computing the Red Cell Count on, 37
Photoelectric Colorimeter, A Method for the Quantitative Determination of Serum Bilirubin with, 55
Pipet Washer, Homemade, 16
Plasma and Blood, Filter Drip Unit for Dispensing, 75
Plasma, Simple Outfit for Drying from the Frozen State, 10
Proteins in Cerebrospinal Fluid, Determination by the Biuret Method, 43
Protein in Cerebrospinal Fluid, Note on the Measurement by the Biuret Method, 47
Questions for Practical Examination Held by the Registry of Medical Technologists of the American Society of Clinical Pathologists in October, 1943, 19
Questions for Written Examination Held by the Registry of Medical Technologists of the American Society of Clinical Pathologists in October, 1943, 18
Red Cell Count, Method for Computing on Photoelectric Colorimeter, 37
Registry of Medical Technologists of the American Society of Clinical Pathologists, Questions for Practical Examination Held in October, 1943, 19
Registry of Medical Technologists of the American Society of Clinical Pathologists, Questions for Written Examination Held in October, 1943, 18

Rh Agglutination, A Rapid, Simple and Economical Method, 114
Rh, See also Anti-Rh Serums, 116
Rings, Permanent, for Glass Slides, A Simple Method of Making, 136
Saliva Glucose, A Quantitative Method for Its Determination In Young Children, 70
Salmonella and Paracolon Organisms, New Medium for the Differentiation of, 26
Sheep Cells, Stored for the Complement Fixation Test, 6
Sheep Erythrocytes, See also Complement-Fixation Reaction, 103
Spinal Fluid, Typing Meningococci Directly from, 35
Staining, Automatic Differentiator for, 59
Staining Method for Thin and Thick Smears for Malaria and Other Cell Containing Body Fluids, 68
Tissue Trimming Board, Combination Cork-Paraffin, 17
Trichinoscope, A New Type of, 98
Trichinosis, Laboratory Procedures for the Diagnosis of, 87
Tube Holder for Fungus Studies, 101
Tubercle Bacilli, A Comparative Study of Guinea Pig Inoculation and Cultures for the Demonstration of, 93
Urine, Toxicity of, in Friedman Test for Pregnancy, 41

1944

CONTENTS

Number 1, January, 1944

Lead Semisolid Agar, a Medium for Use in the Identification of the Enteric Group of Bacteria. Frances Friewer and Howard J. Shaughnessy 1
Stored Sheep Cells for the Complement Fixation Test. Winifred Ashby 6
Simple Preparation of a Standardized Colloidal Gold. O. J. Pollak 8
A Convenient and Rapid Method for Staining Glucogen in Paraffin Sections with Best's Carmine Stain. John P. Mullen 9
A Simple Outfit for Drying Plasma from the Frozen State. Ralph W. G. Wyckoff and J. B. Lagsdin 10
A Homemade Pipet Washer. I. Milton Wise 16
A Combination Cork-Paraffin Tissue Trimming Board. Rubye A. J. Wilson 17
Questions for Written Examination Held by the Registry of Medical Technologists of the American Society of Clinical Pathologists in October, 1943 18
Questions for Practical Examination Held by the Registry of Medical Technologists of the American Society of Clinical Pathologists in October, 1943 19

Number 2, March, 1944

Erythrocyte Fragility. E. A. Fennel, M.D. 21
A New Medium for the Differentiation of Salmonella and Paracolon Organisms. Oscar Felsenfeld, M.D., and Viola Mae Young 26
The Operation of a Complete Blood Bank Service Utilizing Assembled Parts. S. Brandt Rose, M.D., and Ignatius S. Hneleski, M.D. 28
Typing Meningococci Directly from Spinal Fluid. 2nd Lt. Charles D. Cox, Sn.C., A.U.S. 35
A Simple Procedure for the Detection of Arsenic in Body Fluids. Capt. Sidney Kaye, San.C. 36
A Method for Computing the Red Cell Count on the Photoelectric Colorimeter. Grace M. Parker, Helen E. Spicer, and Howard Porter 37
A Simple Instrument for Reading of Flocculation, Precipitin and Agglutination Reactions. Capt. Crichton McNeil, Medical Corps 39
Toxicity of Urine in the Friedman Test for Pregnancy 41
News and Notices 41

Number 3, May, 1944

The Determination of the Proteins in Cerebrospinal Fluid by the Biuret Method. Marie A. Andersch, Ph.D. 43
A Note on the Measurement of Protein in Cerebrospinal Fluid by the Biuret Method. F. William Sunderman, M.D., and Pauline Schmidt 47
Differentiations of Leucocytes in the Counting Chamber by Propylene Glycol-Aqueous Stains: A Screen for the Detection of Major Blood Abnormality. Theron G. Randolph, M.D. 48
Note on the Clarification of Bile. Roger S. Hubbard, Ph.D., and Mary K. Jewett 53
A Method for the Quantitative Determination of Serum Bilirubin with the Photoelectric Colorimeter. W. N. Powell, M.D. 55
A Simple Paraffin Embedding Apparatus. Lieut. Robert V. Bucklin, Medical Corps, United States Army 58
Automatic Differentiator for Staining. Alice Dritz 59
Blood Collection Tray. Major Donald J. Rehbock, M. C., A.U.S. 62

Number 4, July, 1944

Preparation of Crude Penicillin for Local Application. Robert E. Hoyt, Ph.D., Milton Gjelhaug Levine, M.S., Ph.D., and O. B. Pratt, M.D. 65
Staining Method for Thin and Thick Smears for Malaria and Other Cell Containing Body Fluids. Lt. Col. Leon S. Medalia, M.C., Captain Jack R. Kahaner, M.C., and Lt. Arnold J. Singer, Sn.C. 68
Saliva Glucose: A Quantitative Method for Its Determination in Young Children. Cecelia M. Kortuem, R.N., M.T. (ASCP) 70
Filter-drip Unit for Dispensing Blood and Plasma. Max M. Strumia, M.D. 75

A Rapid and Specific Method for the Estimation of Bismuth in Urine. Captain Sidney Kaye, Sn.C., A.U.S., and Julio C. Castillo 81
A Rapid and Specific Method for the Detection and Estimation of Mercury, Bismuth and Arsenic in Body Fluids. Captain Sidney Kaye, Sn.C., A.U.S. 83
News and Notices 85

Number 5, September, 1944

Laboratory Procedures for the Diagnosis of Trichinosis. James B. McNaught 87
A Comparative Study of Guinea Pig Inoculation and Cultures for the Demonstration of Tubercle Bacilli. Major Frank Lande, M.C., A.U.S., and Raymond F. Dixon 93
Note on Friedman Pregnancy Test Using Blood Serum. Newton Evans, M.D., and Aram A. Krajian 97
A New Type of Trichinoscope. S. E. Gould 98
A Tube Holder for Fungus Studies. Captain Herbert E. McDaniels, Sn.C., A.U.S. 101
News and Notices 101

Number 6, November, 1944

Sheep Erythrocytes for the Complement-Fixation Reaction. Dr. D. L. Coffin 103
Preparation of a Kahn Like Antigen from a Tissue other than Beef Heart. Capt. Moses Kopel, M.C., and Capt. William S. Jackway, Sn.C. 107
The Laughlen Test. G. F. Laughlen, M.D. 109
A Rapid, Simple and Economical Method for Rh Agglutination. Bruce Chown, M.D. 114
The Action of Sodium Ethylmercurithiosalicylate on Human Anti-Rh Serums. Robert K. Waller, M.D. 116
A Simplified Benedict Test for Glycosuria. Joseph A. Kasper, M.D., and Isabelle Jeffrey 117
A Practical Inexpensive Apparatus for Administering Blood or Blood Derivatives. Esther L. Bowser 122
A Basket Carrier for Dehydration of Tissue. Emerson M. Zapata and James B. McNaught 125
Plaster of Paris Embedding Boats. Emerson M. Zapata and James B. McNaught 126
Microscopy of Latex Rubber-Injected Specimens. G. E. Lathrop and Ruth Krupp 128
Microtechnic of the Pathologic Eye. G. E. Lathrop 131
A Method for Helminth Ova. G. E. Lathrop 135
A Simple Method of Making Permanent Rings for Glass Slides. Sister M. Emmanuella 136
A Note on the Cleaning of Loeffler Tubes. Elvyn G. Scott 137
Subject index 139
Author index 140
